

7.1.5 D Landscaping with trees

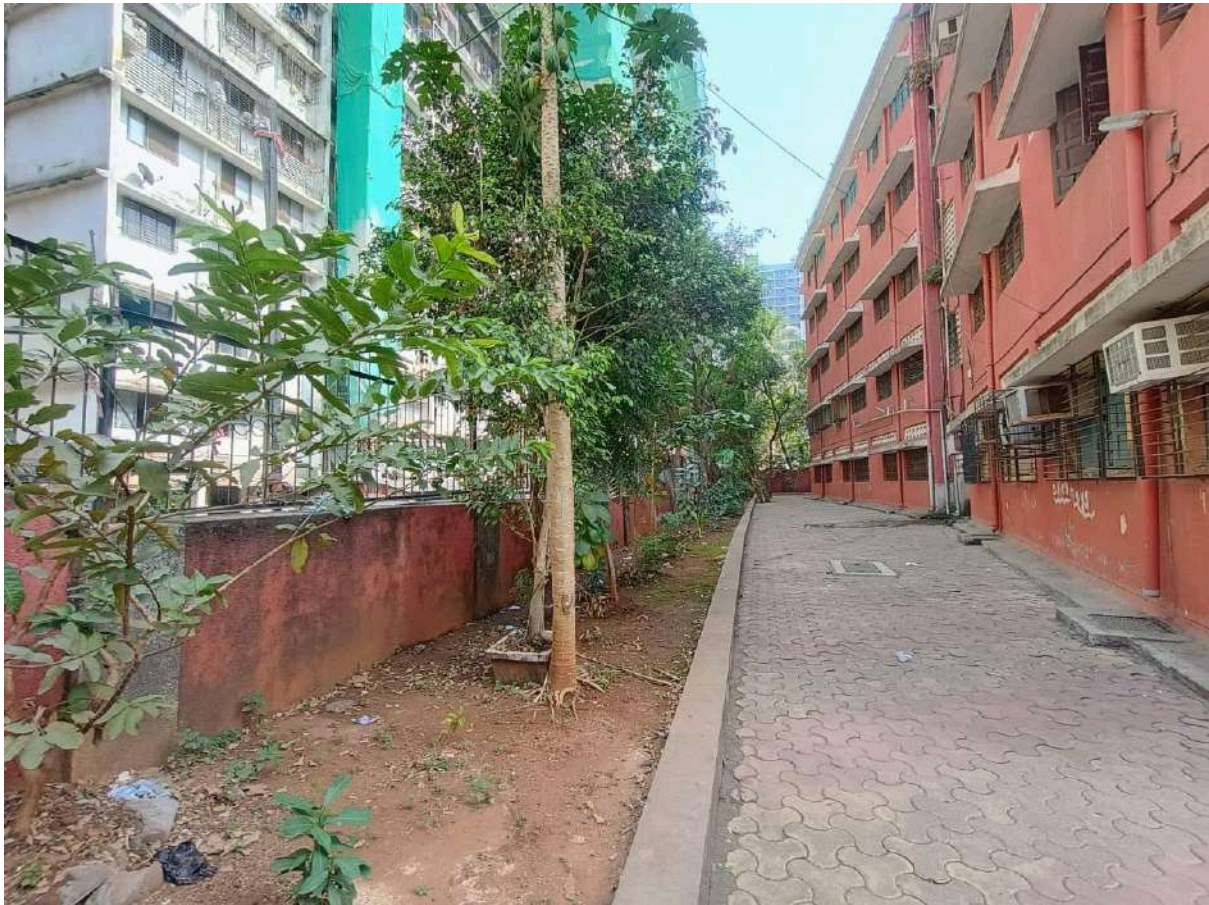

The college campus features great landscaping with a variety of trees planted throughout the premises. These trees not only enhance the aesthetic appeal of the campus but also contribute to a healthier, more sustainable environment. They provide shade, reduce the urban heat effect and improve air quality, making the campus a more comfortable and eco-friendly space. The green areas are carefully maintained to create calm spots for students and staff to relax and enjoy nature. The thoughtful integration of trees into the campus landscape reflects the college's commitment to environmental sustainability and creating a welcoming, natural atmosphere for all.
